

# Fernando Haro Calvo

Ensenada, Mexico | Open to remote work and relocation | Spanish native, English fluent

+52 646-161-7575 | [fernando.haro.c@gmail.com](mailto:fernando.haro.c@gmail.com) | [linkedin.com/in/haro-fernando](https://linkedin.com/in/haro-fernando) | [github.com/Scalaptia](https://github.com/Scalaptia) | [fharo.dev](https://fharo.dev)

## EDUCATION

### Universidad Autónoma de Baja California

B.S. in Software and Emerging Technologies Engineering | GPA 9.6/10

Ensenada, BC

Aug 2022 - Jun 2026

## EXPERIENCE

### PSL Group

Remote

Intern, Application Developer | React, TypeScript, AWS

Mar 2026 - Aug 2026

- Developed responsive React interfaces for a medical news feed and source-grounded chatbot, taking the team redesign from kickoff to production on a shared multi-brand codebase.
- Fixed chatbot routing with per-brand configuration so questions searched the correct medical sources.
- Proposed and implemented automated Playwright report delivery. GitHub Actions uses AWS OIDC to publish each run to S3, serve reports through CloudFront, and post links to Google Chat.
- Created Claude Code skills for QA to generate and debug Playwright tests, with required human approval.

### EPAM Systems

Remote

Automated Testing Trainee, university-company program | Java, Selenium, TestNG

Oct 2025 - Mar 2026

- Built Java test suites and reusable utilities on the Page Object Model, including a parallelized suite for an internal tool.

### Tech4Good Research Lab, UABC

Ensenada, BC

Software Developer & Research Assistant | React Native, Supabase

Mar 2025 - Sep 2025

- Architected The Autism Compass rebuild after reviewing its legacy PHP platform. Built the complete 20+ screen React Native app for autism screening within a multidisciplinary team.
- Authored the software requirements specification in a user-centered process informed by 16 stakeholder interviews, with app validation by four autism specialists.
- Implemented configuration-based scoring for three screening instruments and a normalized PostgreSQL schema with row-level security for caregivers, specialists, and administrators.

## PROJECTS

### Stilo | AI wardrobe and outfit app

Oct 2025 - Present

- Developed wardrobe management and the outfit editor in React Native, plus a NestJS GraphQL API with Prisma and Python FastAPI services for manual and AI-assisted outfit creation.
- Designed a three-stage outfit engine. Gemini plans garment categories, pgvector retrieves clothes from the user's wardrobe, and Gemini composes outfits under style and color rules.
- Co-authored a paper accepted at MexIHC 2026. In a 10-person study, AI-assisted outfit creation required 83.4% fewer interactions than manual creation; Stilo scored 86.75/100 on the System Usability Scale.

### NASA Explorer | NASA Space Apps Challenge

Oct 2025

- Implemented chat and history in NestJS and a Python ingestion pipeline for a space-biology research tool using Vertex AI RAG Engine to answer questions with source citations.
- Created a React knowledge graph; our team won local 1st place and Global Nominee status at NASA Space Apps.

### Awita | Household water-tank monitor

2025 - Present

- Deployed a monitor for family use. One sensor reports each minute to a Go AWS Lambda; MySQL, a NestJS API, and a React dashboard provide tank-level history and email alerts.

## TECHNICAL SKILLS

**Languages:** TypeScript, JavaScript, Python, Java, Go, SQL

**Frontend:** React, Next.js, React Native, Expo, HTML, CSS, Tailwind CSS, responsive design

**Backend & AI:** Node.js, NestJS, FastAPI, REST APIs, GraphQL, Prisma, PostgreSQL, Supabase, LLMs, RAG

**Cloud & Testing:** AWS, Azure, Docker, Terraform, Git, GitHub Actions, CI/CD, Playwright, Selenium, Vitest

## HONORS & LEADERSHIP

**CENEVAL EGEL-ISOFIT**, Outstanding Performance, highest score band

Apr 2026

**ENITCI**, 1st place in Engineering & Technological Development, The Autism Compass

2025

**CTRL-Coders co-founder**, weekly algorithms workshops for 80+ students

Oct 2024 - May 2026
