EDUCATION

Universidad Autónoma de Baja California

B.S. in Software and Emerging Technologies Engineering | GPA: 9.6/10.0

Ensenada, BC

Aug 2022 – Jun 2026

WORK EXPERIENCE

PSL Group

App Dev Intern | React, Node.js, AWS, TypeScript

Remote

Mar 2026 – Present

- Shipped user-facing features across several AI-driven platforms using **React** and **Node.js** in an international Agile team.
- Built a continuous delivery pipeline with **GitHub Actions**, **AWS (S3, CloudFront, WAF)**, and Google Chat.
- Scaled **Playwright** regression suites from 25% to 85% coverage, reducing manual testing time by ~50%.

EPAM Systems

Automated Testing Trainee | Java, Selenium, TestNG, RestAssured, Jenkins

Remote

Oct 2025 – Mar 2026

- Completed an intensive training covering TA frameworks, CI/CD pipelines, and software quality assurance methodologies.
- Built reliable automated test suites and reusable utilities applying **SOLID** principles and **Page Object Model**.

Tech4Good Research Lab

Fullstack Developer Intern | React Native, Supabase, TypeScript

Ensenada, BC

Mar 2025 – Oct 2025

- Architected and built **The Autism Compass**, a React Native app connecting families to ASD screening tools and specialists.
- Designed a HIPAA-compliant schema with RLS and Edge Functions for secure, scalable data handling.

PROJECTS

NASA Explorer | React, NestJS, MongoDB, GCP, Vertex AI

Oct 2025

- Built a RAG pipeline with **Vertex AI**, empowering scientists to query 600+ space biology papers in plain language.
- Developed a backend with **NestJS**, and built an interactive **D3.js** citation knowledge graph.
- Wrote the **Python** pipeline that scraped and ingested NASA publications from multiple sources using **Beautiful Soup**.

Stilo | React Native, NestJS, PostgreSQL, Azure, Gemini, OpenTofu

Oct 2025 – Present

- Engineered an AI fashion app that lets users take photos of their wardrobe and the app builds coordinated outfits.
- Built a RAG pipeline using **Gemini** for prompt decomposition, **pgvector** for similarity search, and a composition engine factoring in colorimetry, style preferences and clothing metadata.
- Ran a controlled experiment (n=10) that found AI-assisted outfit creation reduced UI interactions by **83.4% (p=0.001)**, lowered cognitive load by 22.3% (NASA-TLX), and scored 86.75/100 on the System Usability Scale.

Awita | React, NestJS, AWS, Serverless, Arduino, TensorFlow

Aug 2025 – Dec 2025

- Designed an IoT water monitor for regions with unreliable supply involving an **Arduino** sensor, **Go Lambda** that handles 1,000+ daily sensor readings at <200ms latency, and an **LSTM model** that predicts when you'll run dry.
- Built a **NestJS** backend deployed with Serverless Framework, handling user management using **Clerk**, Email alerts, and a **React** dashboard with real-time updates and historical charts.

HONORS & AWARDS

CENEVAL EGEL Plus ISOFT – Excellence Recognition (top 1% nationally)

Apr 2026

1st Place in ENITCI 2025 (Engineering and Development Category)

Nov 2025

1st Place Local & Global Nominee in NASA Space Apps Challenge 2025

Oct 2025

1st Place in CTRL-Coders 1st open competitive programming contest

Apr 2025

Honorable Mention in Elegis-Tech 3 Hackathon

Mar 2025

PROGRAMMING LANGUAGES & TECHNOLOGIES

Languages:	TypeScript, JavaScript, Python, Java, C++, SQL
Frontend:	React, React Native, Next.js, TanStack, Shadcn, Tailwind
Backend:	Node.js, NestJS, FastAPI, Express, Prisma, PostgreSQL, MongoDB, Redis
Cloud & DevOps:	AWS, Azure, GCP, Docker, Jenkins, GitHub
Testing & Tools:	Playwright, Selenium, Vitest, Git, Linux, Jira, Postman
Spoken Languages:	Spanish (Native), English (Professional Working Proficiency)

LEADERSHIP

CTRL-Coders Competitive Programming Club | Co-Leader

Oct 2024 – Apr 2026

- Lead weekly DSA workshops for 80+ students and prepared teams for ICPC regionals.
- Recorded educational content and managed social media, organizing activities and increasing community engagement.
